Honda CR-V Key Information

Performance

The perfect balance of performance and fuel-efficiency, the new CR-V delivers the power and torque you need, when you need it.

This is harnessed by five distinct drive modes: Sport, Normal, Econ, Snow and Tow (Plug in Hybrid Only) which automatically changes the vehicle set-up to provide the optimum performance, traction and efficiency.

Technology

We've packed a whole range of helpful and informative technology into the CR-V, including high-resolution screens and seamless connectivity.

Safety

We are committed to keeping everyone safe, which is why we've included a whole range of advanced driver assistance systems into the CR-V.

With the new CR-V, we introduce our most advanced safety system yet – the Honda SENSING 360*, which expands the existing Honda SENSING range to 360 degrees around the car, with additional corner radars and cameras in the front. The enhanced range not only covers additional blind spots around the vehicle, helping avoid collisions with other vehicles and pedestrians, but also reduces driver strain while driving.

Full Hybrid

- 10.2" digital driver display
- 9" Honda CONNECT infotainment system
- Wireless charger for smartphone
- Head Up Display*

Plug-in Hybrid

- 10.2" digital driver display
- 9" Honda CONNECT infotainment system
- Wireless charger for smartphone
- Head Up Display*
- My Honda+ App
- Additional parking sensors

Disclaimer: The information provided in this Guide is for general information purposes only and is correct to the best of our knowledge at the date of publication (April 2024). While we have made every effort to ensure the information in this document is accurate, neither Honda (UK) nor the author can be held responsible for any actions or consequences arising from acting on, or refraining from, taking any action as a result of reading this. The fuel consumption you achieve under real life driving conditions, and CO₂ produced, will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Figures stated are based on a standardised test cycle and may not reflect real world driving, therefore they should be used for comparison purposes only. Customers should only compare vehicles tested to the same technical procedures. There is a new test for fuel consumption and CO₂ figures. You can find out more about the changes brought in by WLTP at <http://wltpfacts.eu/>.
