Honda ZR-V Key Information

Full Hybrid

The ZR-V uses a combination of electric motors and a petrol engine to create copious, electric power that drives you along for mile after enjoyable mile, while a regenerative braking system returns waste energy to top-up the EV battery.

Performance

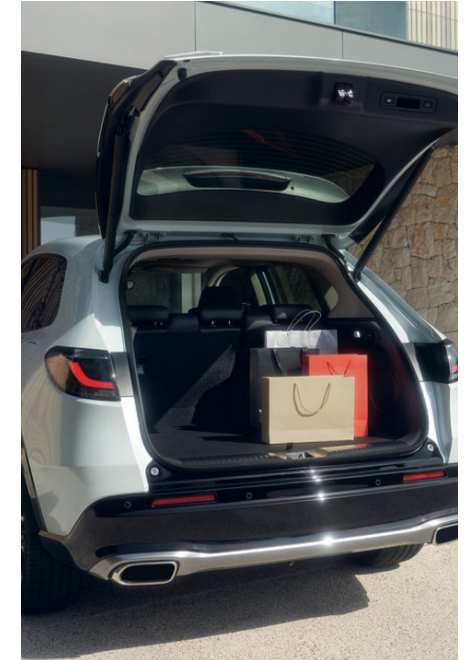

Engineered with a sport chassis, the ZR-V displays agile handling and a composed ride. Couple this dynamic stamina with the advanced e:HEV powertrain and you will have a rewarding and energetic drive.

Technology

An informed driver is a better driver. That's why the ZR-V's crystal-sharp, digital multi-info display really scores, with everything presented logically and clearly in front of the driver. On the Advance grade, there is also a head-up display that communicates essential data even more quickly.

The ZR-V has been designed to offer the flexibility and practicality that you need. Its vast boot has a generous 1,322 litre capacity*. What is more, it is easy to access thanks to the hands-free power tailgate** and the rear seat split-folds, making loading easy.

*VDA method. **Select grades only.

Safety

Honda SENSING is an intelligent suite of advanced safety features that will assist you as you drive, consisting of:

- Collision Mitigation Braking System
- Lane Departure Warning
- Road Departure Mitigation
- Lane Keeping Assist System
- Adaptive Cruise Control with Low-Speed Following

Disclaimer: The information provided in this Guide is for general information purposes only and is correct to the best of our knowledge at the date of publication (July 2023). While we have made every effort to ensure the information in this document is accurate, neither Honda (UK) nor the author can be held responsible for any actions or consequences arising from acting on, or refraining from, taking any action as a result of reading this. The fuel consumption you achieve under real life driving conditions, and CO₂ produced, will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Figures stated are based on a standardised test cycle and may not reflect real world driving, therefore they should be used for comparison purposes only. Customers should only compare vehicles tested to the same technical procedures. There is a new test for fuel consumption and CO₂ figures. You can find out more about the changes brought in by WLTP at <http://wltfacts.eu/>.
